# Ampiclox L.C. Intramammary Antibiotic Infusion

## Active Constituent

Each 3 g syringe contains:

200 mg CLOXACILLIN AS THE SODIUM SALT

75 mg AMPICILLIN AS THE SODIUM SALT

## Actions

elevet+ Ampiclox L.C. Lactating Cow Intramammary Antibiotic Infusion is a broad-spectrum antibiotic preparation indicated for the early treatment of bovine mastitis where sensitive organisms are present.

The combination of ampicillin and cloxacillin provides a synergistic, broad-spectrum bactericidal effect against all major Gram-positive and Gram-negative bacteria associated with mastitis. The formulation ensures effective antibiotic concentrations are achieved in udder tissue, with no irritant properties.

## Indications

- Routine treatment of clinical mastitis in lactating dairy cows
- Treatment of clinical mastitis when the cause of infection is unidentified or where the presence of coliforms are suspected or known to be present as a problem on the farm.

Elevet+ Ampiclox L.C. Lactating Cow Intramammary Antibiotic is active against Gram positive and Gram-negative bacteria associated with mastitis.

It is highly effective against *Streptococcus agalactiae* and other *streptococcal* species, Penicillin resistant and sensitive *Staphylococci*, *Corynebacterium pyogenes*, *Escherichia coli* and some other Gram-negative bacteria.

## Contraindications

Contraindicated for use in cows exhibiting sensitivity to penicillin.

## Precautions

Indiscriminate use of elevet+ Ampiclox L.C. Lactating Cow Intramammary Antibiotic Infusion could contribute to the development of antibiotic resistance.

## Dosage & Administration

**Wear sanitised rubber gloves when applying.**

**Dose:** Apply one syringe every 12 hours for 3 treatments per affected quarter.

**Administration:** After milking, clean and disinfect the teat with an approved teat disinfectant. Insert the nozzle into the teat canal and apply gentle and continuous pressure on the plunger until all the suspension is expressed. Holding the end of the teat in one hand, gently massage upwards with the other to aid dispersion of the antibiotic into the quarter.

Dip all teats after infusing in an approved teat disinfectant.

The treated quarter(s) should be milked out at the next normal milking and milk withheld from the general collection. For advice on feeding calves with milk taken during the withholding period, contact your prescribing veterinarian.

### General Directions

---

Elevet+ Ampiclox L.C. Lactating Cow Intramammary Antibiotic is only for use by or under direction of a veterinarian. The best results will be obtained when treatment is commenced at the first signs of infection, before there is too much tissue damage or abscess formation.

Dry Cow Therapy Selective dry cow therapy is recommended as a valuable aid in the control of mastitis. Contact your consulting veterinarian. elevet+ Ampiclox Dry Cow Intramammary Antibiotic Infusion is formulated specifically for this purpose and is available in buckets of 200 syringes.

### Withholding Periods

---

MILK: Milk taken from cows within 72 hours (6 milkings) following treatment MUST NOT BE USED for human consumption or processing, or fed to bobby calves.

MEAT: DO NOT USE less than 30 days before slaughter for human consumption.

Any variation by the prescribing veterinarian to the approved dose, frequency, duration or target species may require extending the approved withholding period.

### Trade Advice

---

Export Slaughter Interval (ESI): This product does not have an ESI established. For advice on the ESI, contact AVet Health on 1300 28 38 28 before using the product.

### First Aid

---

If poisoning occurs, contact a doctor or Poisons Information Centre on 13 1126 (Australia).

### Safety Data Sheet

---

For Safety Data Sheet see [www.avet.health](http://www.avet.health)

### Presentation

---

Syringe containing 3 grams.

Box of 20 syringes.

### Disposal

---

Dispose of used packaging by wrapping in paper and putting in garbage.

### Storage

---

Store below 25 °C (air conditioning).

### Poisons schedule

---

S4

### Registration Number

---

APVMA Approval Number: 140173
